Rocket fins go here.

color inside
this box

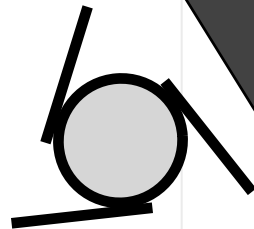

wrap this
edge first

cut along the entire
length of this line.

STEPS

1. Color your rocket. Make it look great!
2. Cut out 3 fins and nose cone.
3. Tightly wrap body of rocket around pipe and tape along entire seam. No leaks!
4. While still on the pipe, seal the top by folding over multiple times and then tape shut. This is important!
5. Tape on 3 fins. NOTE: Fins are taped on in a “rotary” fashion (not perpendicular to rocket body). Refer to diagram showing *view from bottom*.
6. Tape on nose cone.
